Mediation Conference

- *mediation moves* -

6 October 2018

Frankfurt (Oder)

EUROPA-UNIVERSITÄT VIADRINA FRANKFURT (ODER)

The conference title “*mediation moves ...*” holds meaning on various levels: Mediation is not only “alive and kicking”, it also keeps unfolding into new areas of conflict and fields of practice. Mediation as a professional service moves conflict resolution, negotiation and other decision-making processes forward. At the same time, the positive conception of human beings that underlies the basic principles, communication models and aspired attitude in mediation touches and moves people to the core.

The conference day has been designed to provide room for open, productive exchange both on relevant theoretical and practical questions and on aspects of personal values and motivation. The participants will be encouraged to actively and authentically pursue these questions, share their thoughts and experiences – and generate new ideas.
